

MULTI PURPOSE, LDPE DAMP PROOFING COURSE

DESCRIPTION

OBAPROOF DPC is a low density polyethylene sheet, it is commonly used as a moisture barrier for damp-proofing in underground construction, it also act as a separation layer and protection layer.

ADVANTAGE:

- Good elongation
- Easy application
- Light weight
- High tensile strength.
- Seamless
- Good resistance to weathering and chemical agents

APPLICATION AREA:

- Lean concrete surface
- Retaining wall
- Ground beam
- Cement screeding
- Ground slab
- Use as a waterproofing or insulative protection layer

TECHNICAL DATA:

- Material: LDPE
- Colour: Black
- Width: 150mm
- Length: 30m
- Thickness: 0.3mm

RECOMMENDATION OF USE:

- The application substrate must be reasonably even.
- Do not leave sharp item on the substrate to avoid puncturing the DPC.
- It is recommended to overlap 50mm if needed

STORAGE:

- Store at dry area and away from heat and UV
- 12 months in its original unopened packaging
